Brand Statement

I am a hardworker whose resilience is geared to productive results. These past few months I've dedicated myself and my time to becoming a software engineer and increasing my ability to think like a software engineer. I'm highly motivated to get the opportunity to learn from others as well as share the knowledge that I have gained. My ability to consistently be reliable would be an asset to any company. My personal growth is very important to me. I have gained a ton of character and humility from my previous experiences. A few of my biggest interests at the moment are traveling, gaining skills/knowledge, and networking and interacting with others.

Experience

Brooklyn, New York - December 2021- March 2022

General Assembly - *Software Engineer Scholar*

A 500-hour full-stack Software Engineer immersive program focused on the most popular front and backend programming languages, parsing documentation, collaborative projects, researching solutions and critical thinking. Throughout the program I worked on a number of individual and collaborative projects, including:

- Golf - Utilized HTML5, CSS and JavaScript to develop a card game. A two player game where each player takes turns selecting 4 cards from a deck. The player with the lower sum when the game is called is the winner.
- YardSale - Utilizing MEN Stack my partner and I created a used item website. A website geared towards selling and buying local goods. Think Offerup or Letgo. This project enforced our learned skills in building routes, creating RESTful API, implementing relationships(one-to-many/ many-to-many), and using Bulma CSS framework.
- Spacefarer - Using Django and Python my group created a traveler website for our solar system. Navigating through Django's built in methods, creating paths for each webpage, authenticating admin/user logins, and applying bootstrap's open source toolkit to make our website presentable.

Brooklyn, New York - August 2021 - PRESENT

Henry Norman Hotel - *Front Desk/ Night Audit*

- To set a high standard for all incoming guests.
- Following all COVID protocols to ensure the safety and comfort of our guests.
